Summary

Frontend Developer with 3+ years of experience building scalable and high-performance web applications across e-commerce, inventory, crypto trading, and retail/POS systems. Specialized in React and TypeScript, with strong experience in developing real-time applications using REST APIs and WebSocket integrations.

Education

Posts and Telecommunications Institute of Technology
Ho Chi Minh City

Sept 2018 - May 2024

Major: Information Systems

Skills

Frontend: React, TypeScript, Angular, Zustand, React Query.

UI Libraries: Tailwind CSS, MUI, Mantine, Shadcn UI, Ant-Design.

Build & Tooling: Vite, Docker, Vercel, Github Pages.

Backend: Node.js (Express), Java (Spring Boot).

Databases: PostgreSQL, MySQL, SQL Server, MongoDB.

Tools & Workflow: Git, Jira, Agile/Scrum.

Professional Experience

Frontend Developer — SAIGONTEK

Dec 2025 - Present

◆ Tendoo — Retail & Business Management Platform (onsite at Viettel)

- Developed a comprehensive retail and business management platform supporting POS, customer management, workforce management, inventory management, order processing, kitchen display systems (KDS), and pharmacy operations.

- Built and maintained core modules including kitchen management and pharmacy management.
- Built reusable UI components and optimized data fetching using React Query and Zustand.
- Collaborated with cross-functional teams to deliver scalable, maintainable, and user-friendly business solutions.

Tech Stack: React, Ant Design, Tailwind CSS, React Query, Zustand, Vite

Frontend Developer — SAIGONTEK

July 2023 – Dec 2025

◆ Multi-Account Crypto Trading Platform

- Developed a multi-account crypto trading platform allowing users to manage multiple exchange accounts (Binance, Bybit) through securely stored API Keys and Secret Keys.
- Built scalable and reusable UI components with multi-language support and dark mode.
- Integrated REST and WebSocket APIs to deliver real-time market data, order updates, and account information.
- Optimized rendering performance and data-fetching strategies to ensure smooth real-time interactions across devices.
- Implemented core trading modules including Order Form, Order Book, Trading History, Filters, Account Management, Orders, Bots, and Economic Calendar.
- Collaborated closely with the backend team to refine API specifications, improve data workflows, and enhance platform stability.

Tech Stack: React, Mantine, Shadcn, Tailwind

Team Size: 4 (2 Frontend, 2 Backend)

Fullstack Developer — TPS Software

June 2022 – March 2023

◆ Multi-platform E-commerce Ecosystem

- Maintained and enhanced a large-scale e-commerce ecosystem including Web App, Mobile App, Affiliate Web, Tenants Web, Merchant Web, and Admin Portal.
- Developed and maintained Angular modules across multiple platforms.
- Built and optimized Spring Boot APIs for authentication and order management.
- Wrote and optimized SQL queries for PostgreSQL, MySQL, and MongoDB.
- Collaborated in a 16-member Agile Scrum team, participating in sprint planning and cross-team integration.

Tech Stack: Java (Spring Boot), Angular, PostgreSQL, MySQL, MongoDB

Team Size: 16 (7 Backend Developers)
